

Vaping Policy

Students are not permitted to share a vaping device with any other student.

Vaping is not permitted inside any school because all students and staff are entitled to a clean air environment. Vaping is not permitted outside on school property. If a student wants to vape then they must be away from the school's property.

If a student is seen sharing a vaping device or vaping inside the school or outside on school grounds then the following consequences will be enforced:

1. The student must forfeit the vaping device to a staff member or the principal. The vape will be secured in the main office and returned to a parent.
2. The student will be given a **one day suspension** for polluting the air and disobeying the school vaping policy.
